1. HERO & PRÉSENTATION HERO SECTION

En-tête & Titre Principal

Page d'accueil

Titre affiché en ouverture

Badge de statut : Currently at Alstom

Nom & Prénom : Hani IZEM

Poste / Sous-titre : Project Configuration & Change Manager

Bouton d'action principal (CTA) : Explore My Journey (#experience)

Bouton de contact (CTA) : Get in Touch (#contact)

2. ABOUT ME (À PROPOS) ABOUT SECTION

Ingénieur en Électronique et Informatique Industrielle

• TEXTE DE PRÉSENTATION (BIO DU PORTFOLIO)

Passionate about embedded systems and railway transport, I bring a unique blend of technical expertise and project management skills to every challenge. My journey spans from designing electronic circuits to optimizing large-scale configuration management systems.

Currently driving innovation at **Alstom**, I specialize in PLM systems, automation, and cross-functional team coordination on major railway infrastructure projects.

• TEXTE DE SYNTHÈSE DÉTAILLÉ (DATA.JS)

Electronics and Industrial Computer Science Engineer with 3 years of work-study experience at Renault as an Embedded Systems Engineer. Currently Project Configuration & Change Manager at Alstom, I excel in process optimization, compliance tracking automation and tooling management. Curious and proactive, I quickly adapt to new technologies. Motivated and determined, I aim to contribute to ambitious technical projects in the transportation and industrial sectors.

• CHIFFRES CLÉS (KEY STATS)

- **4+ Years Experience** : Années d'expérience professionnelle dans les transports ferroviaires et automobiles.
- **10+ Projects Delivered** : Projets menés à terme avec succès (projets industriels & académiques).
- **4 Tech Domains** : Domaines d'expertise technologique couverts.

• CŒUR D'EXPERTISE (CORE EXPERTISE PILLS)

[PLM Systems](#)[Configuration Management](#)[Embedded Systems](#)[Railway Transport](#)[Process Automation](#)[Team Coordination](#)

3. PROFESSIONAL EXPERIENCE (PARCOURS PROFESSIONNEL)

CAREER
PATH

« From embedded systems at Renault to configuration management at Alstom, my journey reflects a passion for complex technical challenges. »

Alstom

2024 - Present • En cours

Project Configuration & Change Manager

Adresse / Localisation : Paris, France

- MISSIONS PRINCIPALES — MÉTRO DE MARSEILLE (SIGNALING)**
 - System and subsystem configuration management for the Marseille Metro project on signalling.
 - Coordination of subsystem teams and interface with FIVP (Factory Integration and Validation Platform) and T&C (Test and Commissioning) teams to synchronize test and validation processes.
 - Leading configuration review meetings, delivery reviews and Change Control Board (CCB) committees.
 - Support for the use of TpPLM, EWM and ClearQuest tools.
 - Development of automation tools using VBA and Power Query (M language) for recurring task optimization and KPI generation (reducing recurring reporting effort by 85%).
- MISSION COMPLÉMENTAIRE — PROJET RER NG (COMMISSIONING SUR VOIE)**

Project Manager Mission — RER NG Project
 - System validation on RER NG project trains on live tracks as Chargé de Travaux.
 - Software updates and firmware flashing for safety-critical ECUs: BCU (Brake Control Unit), TDD, DAD, Net Box, etc.
 - Maintenance and troubleshooting, including garage operations, BV, and fault finding during commissioning.
- VERSION SYNTHÉTIQUE (COMPOSANT TIMELINE)**
 - Leading configuration management for major railway projects.
 - Implementing PLM processes and ensuring data integrity across cross-functional teams.
 - Developing automation solutions using VBA and Power Query to optimize workflows.
 - Coordinating change management activities and ensuring compliance with railway standards.

Renault Group

2020 - 2023 • 3 ans

Embedded Systems Engineer (Work-study program / Alternance)

Adresse / Localisation : Guyancourt / Saint-Quentin-en-Yvelines, France

• MISSIONS & RÉALISATIONS CLÉS

- Design and implementation of project management tools.
- Development of a Python report generation tool, including source code reverse engineering, DataFrame manipulation with Pandas and graph creation with Matplotlib.
- Optimization of DOORS requirements management, ensuring end-to-end traceability meeting strict ISO 26262 automotive safety standards through custom modular DXL scripts.
- Implementation of a continuous integration (CI) ETL pipeline to extract, transform and load JIRA data to automate the cybersecurity status report of vehicle ECUs (cutting audit cycles from 2 weeks to under 15 minutes).
- Project monitoring and testing, with active participation in the software quality assurance (QA) process.
- Formalization of specifications, technical documentation and tutorial creation for engineering teams.

Sonatrach DRG

2017 - 2018

Discovery Internship (Stage de Découverte)

Adresse / Localisation : Béjaïa, Algérie

• MISSIONS RÉALISÉES

- First exposure to heavy industrial petrochemical processes and mission-critical engineering environments.
- Maintenance and installation/servicing of electrical equipment, high-power distribution circuits and safety relays.
- Verification and tracking of hydrocarbon quantity and volume levels in storage tanks via automated remote commands and SCADA telemetry.
- Learned fundamentals of industrial project documentation, standard operating procedures (SOP), and technical reporting.

4. EDUCATION & TRAINING (FORMATION ACADÉMIQUE)

ACADEMIC
BACKGROUND

« A solid foundation in electronics, computer engineering, and continuous learning in modern technologies. »

EI2I – Electronics and Computer Engineering

2020 - 2023

Diplôme d'Ingénieur — Électronique et Informatique Industrielle

Établissement / Adresse : Polytech Sorbonne, Paris, France

• PROJETS PHARES (PROJECTS)

Wheelchair motorization kit (Arduino, BMS, GANTT/FMEA)

Connected beehive IoT (Sensors, Telemetry)

Polyphonic synthesizer (FreeRTOS, Microcontroller)

• TECHNICAL SKILLS & CURRICULUM

- Analog and digital telecommunications
- Electromagnetism, Optoelectronics
- Real-time systems (RTOS: FreeRTOS, real-time kernels, multitasking)
- Internet of Things (IoT: sensors, wireless telemetry, microcontrollers)
- Database management (SQL, relational schemas, data modeling)
- Object-oriented programming (Java, C++)

• BUSINESS & ENTERPRISE KNOWLEDGE

- Industrial management & Production systems
- Introduction to project management (GANTT, FMEA/AMDEC)
- Professional efficiency, Strategy and performance
- Sustainable development & Eco-design
- International economics and markets
- Entrepreneurship week & Innovation incubator
- English for Engineers & Language stay (Malta, TOEIC)

Bachelor's Degree – Electronics, Electrical Energy and Automation (EEA)

2018 - 2020

Licence EEA — Électronique, Énergie Électrique, Automatique

Établissement / Adresse : Sorbonne University, Paris, France

• PROJETS PHARES (PROJECTS)

Delivery robot for social distancing (Signal processing, Magnetic guidance)

Pattern recognition (C, Legendre orthogonal moments)

• CORE TECHNICAL CURRICULUM

- Digital and analog electronics (amplification, active filtering, operational amplifiers)
- Integrated circuit design and implementation in clean rooms (Cadence, PSpice)
- Programming in C, MATLAB and Simulink modeling
- Signal processing (FFT, sampling, filtering) and control systems
- Image and sound digital processing
- VHDL, FPGA architectures, microcontrollers
- Electronic circuit design and board prototyping

• PROFESSIONAL SKILLS & METHODOLOGIES

- Work organization and adaptability in laboratory environments
- Technical documentation usage, datasheets interpretation
- Teamwork and peer collaboration on complex electronics benches
- Documentation, written and oral presentations of technical findings

Python for Data Science and Machine Learning Bootcamp

2020 / 2023

Certification & Bootcamp Intensif

Organisme / Adresse : Udemy — Online Certified Training

• DATA SCIENCE & MACHINE LEARNING CURRICULUM

- Big Data analysis and distributed processing with PySpark.
- Numerical computing and high-performance multidimensional arrays with NumPy.
- Data extraction, cleansing, transformation and feature engineering with Pandas.
- Statistical visualization with Matplotlib and Seaborn.
- Interactive data visualizations and web-ready plots with Plotly.
- Natural Language Processing (NLP), text tokenization, and spam filtering algorithms.
- Supervised & unsupervised machine learning: linear/logistic regression, decision trees, random forests, and k-means clustering.

5. CERTIFICATIONS & TRAINING (CERTIFICATIONS OFFICIELLES)

CREDENTIALS

Formations certifiantes officielles attestant de compétences normatives, sécuritaires, linguistiques et méthodologiques.

1. Electrical Certification BT/HT

Adresse / Organisme : Temis Formation

Description : Low and High Voltage electrical safety certification (Habilitation Électrique B2V, BR, BC pour environnements industriels ferroviaires 25kV / 1.5kV).

2. TOEIC for Engineer

Adresse / Organisme : IELTS Malta

Description : English proficiency certification for engineering professionals (Attestation internationale de maîtrise de l'anglais technique et managérial — Niveau C1).

3. Railway Systems Engineering

Adresse / Organisme : Alstom University

Description : Comprehensive training on railway signaling and control systems (Ingénierie des systèmes ferroviaires, principes de signalisation, architecture CBTC et sécurité de fonctionnement).

4. APSYS for Projects

Adresse / Organisme : Alstom University

Description : Project management methodology and tools certification (Méthodologie Alstom Production System appliquée au pilotage de projet, standardisation et élimination des gaspillages).

5. DFQ Projects & Programs

Adresse / Organisme : Alstom University

Description : Quality management for projects and programs (Méthodologie Design For Quality : revue des jalons qualité, anticipation des risques et conformité livrables).

6. Ethics & Compliance

Adresse / Organisme : Alstom University

Description : Corporate ethics and compliance training (Conformité réglementaire, déontologie des affaires, intégrité et gouvernance d'entreprise).

6. SKILLS & TECHNOLOGIES (ARSENAL TECHNIQUE)

TECHNICAL
ARSENAL

« A diverse toolkit spanning embedded systems, PLM, and modern development practices. »

• CATÉGORISATION INTERACTIVE DU 1ER PORTFOLIO (FILTRES UI)

• Core Expertise :

PLM Systems

Embedded Systems

• Requirements :

DOORS

• Project Mgmt :

JIRA

• Language :

Python

C

Java

VBA

VHDL

• Tool :

TpPLM

EWM

GitLab

Vivado

Power Query

Matlab/Simulink

- **CLASSIFICATION COMPLÈTE PAR DOMAINE TECHNIQUE (DATA.JS)**

- **PLM & Gestion de Configuration** : TpPLM, EWM (Engineering Workflow Management), ClearQuest, IBM DOORS (DXL Scripting).
- **Langages de Programmation & Scripting** : Python, C, Java, VBA, Power Query (Langage M), MATLAB, VHDL.
- **Outils de Développement & CI/CD** : JIRA, GitLab CI/CD, Xilinx Vivado, ModelSim.
- **Électronique, Matériel & Embarqué** : FPGA, Microcontrôleurs, Arduino, BMS, Bus CAN/FIVP.
- **Environnements & Systèmes d'Exploitation** : Windows, Linux.

7. LANGUAGES & INTERESTS (LANGUES & CENTRES D'INTÉRÊT)

PERSONAL &
INTERPERSONAL

Langues Maîtrisées

Niveaux CECRL

- **Français** : C2 / C1 — Bilingue / Langue maternelle.
- **Anglais** : C1 — Courant / Professionnel (Certifié TOEIC for Engineer, séjour linguistique IELTS Malte).
- **Arabe** : C2 / C1 — Bilingue / Langue maternelle.

Centres d'Intérêt & Engagements

Activités

- **Astronomie** : Passion pour les sciences de l'univers et l'observation.
- **Trésorier adjoint** : Engagement associatif au sein d'une association de jeunesse.
- **Agent de sécurité** : Job étudiant ayant renforcé la rigueur, le sens des responsabilités et le respect des protocoles stricts de sécurité.

8. CONTACT & INFORMATIONS DE CONNEXION

LET'S CONNECT

« Interested in discussing a project or opportunity? I'm always open to new challenges and collaborations. »
